

Introduction to BIM Concepts and Structural Modeling Using Revit

1. Introduction

Building Information Modeling (BIM) is a digital process that involves 3D modeling and data management.

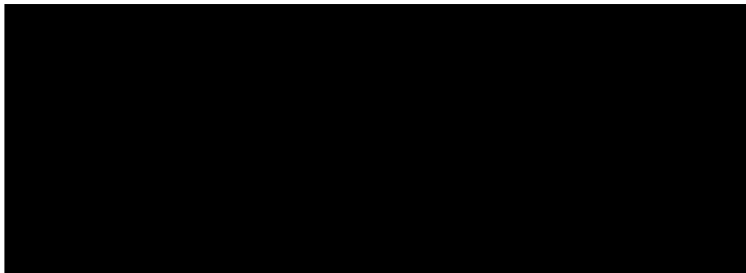

2. Objectives

Understand BIM, learn Revit, and create structural models.

3. BIM Concept

BIM provides intelligent 3D models with data integration.

4. Revit Interface

Includes Ribbon, Project Browser, and Properties Panel.

5. Structural Modeling Steps

Levels, Grids, Columns, Beams, Slabs.

6. Conclusion

Successfully learned BIM and created a structural model.
